## Special Pair-A-Normal Issue!

**Special Note: Psychic's are real! I'm a psychic! My prediction has finally come true, just call me....THE PREDICTOR! I totally predicted the details of outcome of the sports game last night. Now all I have to do is just find the one self-addressed envelope I mailed to myself out of pile of thousands. Just give me a couple weeks. One luckily winner in a thousand is all it takes to be a psychic. Who would have guessed, that I'm psychical?! I sure didn't!**

*Dear Master of Science,*

*I'm having trouble staying faithful to my partner. I have feelings of infidelity that wash over me like waves of lustful water. Any tips for staying on best behavior.*

*-Horny in Huntsville*

**Dear Horndog,**

**While your talking to that person, just close your eyes and imagine what it would be like to get physical with them, run through the whole scenario. Then you'll know what it's like and you won't have to act on the urge. Women do that a lot to me, they just close their eyes, stop responding and walk away. Oh, if none of my advice work for you, I've emailed you my digits, chat me up.**

*Dear Master of Scientific,*

*Is there any evidence for the existence of ghosts? Any spectral experiments out there?*

**Dear X,**

**Science is based on observations: 1) the atom flying across the lab, punching a hole in the wall 2) the infant on the treadmill, wailing 3) weaning the rapacious genetically engineered human/dino hybrids. 4) Lasers. These are all examples of observation. However, in addition to observing events yourself, observations must be seen, heard, touched, felt, smelled or telepathied by others: they must be corroborated.**

**So, since people have observed ghosts, observed them clear as a data readout on a computer,**

**and others have corroborated these observations, then there is scientific evidence for the existence of ghosts.**

*Hey MoS,*

*Are Spirit Guides for real? Mine's really helpful around the house.*

**Crazed Fan,**

**I don't know, but mine's definitely an asshole! Thanks for nothing Larry! And take my power animal, an intelligent parasitic slime mold on a planet in galaxy A544-g57, with you! I'm not sure how to interpret its advice, but it definitely wants to meet. And I'm like, 'have you heard of the speed of light and the limitations it places on space travel?' and its like, 'yum, me hungry, eat you, where you at?' How does this help me guide my purpose in life and find my meaning!? Maybe it's like a Zen Koan.**

*Yo! How about UFO's?*

*-Eyes on the Skis*

**UFO stands for Unidentified Flying Object. So, as phenomena, they surely exist, since the term has very little descriptive content, hence "unidentified." Duh.**

*You know what the last letter meant, are they aliens?*

*-The Crude*

**The Government knows. Oh, they know. I mean it would be easy to convince a large number of smart, well educated, motivated Americans to a lifetime participation in a conspiracy to hide the largest truth ever from humanity, a truth that would make the whistle blower instantly famous, rich and impervious to retribution. Like I just wrote, easy.**

*Email science questions to [sciencemasterof@gmail.com](mailto:sciencemasterof@gmail.com) Master of Science might even read them prior to deletion!*
